REQUIREMENTS

1. OWTS Permit **MUST** be applied for **PRIOR** to Building Permit.
2. Soil test and permit fee must be provided at time of application.
3. Site visit may be conducted.
4. Engineer designed systems must also be approved by design engineer.
5. System Record Drawings are required for all new tanks, fields or complete systems. Maps must be drawn to scale with a north arrow indicated and include a benchmark. System will **NOT** be approved for use until the Record Drawing and/or engineer letter are received.
6. Lot must be marked, and soil profile holes and any perk holes marked properly. Property lines must be marked/visible.
7. Installer must be currently licensed in Elbert County.

Completed applications with necessary documents can be mailed to our PO Box, dropped off at our office or emailed

PROPERTY THAT CONTAIN FLOODPLAINS

If your property contains floodplain, be aware that you may not construct a structure of any kind within the floodplain without first applying for a floodplain permit. This includes OWTS systems. Elbert County Zoning Regulations part II, Sec 25, sec C, 5, c states that applicants will be required to:

Locate all new on-site sewage systems (including leach fields) in areas above the base flood elevation; (except the replacement of a failing system where no alternate location outside the floodplain is available.)
Please take this restriction into account when locating a structure on property that contains floodplain.

Please allow 7 – 10 business days for your inspection to be completed. Because of increased requests, we can no longer do same day or next day inspections. Inspections will be by appointment only. Also, please note that Elbert County Offices are closed on Fridays and all major holidays.

I certify that I have read and understand all of the above:
